

Did you mean this?
service

Run 'minikube --help' for usage.

danielyanez@MacPro-Daniel ~ % minikube service

✖ Exiting due to MK_USAGE: You must specify a service name

danielyanez@MacPro-Daniel ~ % minikube service project-service

NAMESPACE	NAME	TARGET PORT	URL
default	project-service	80	http://192.168.49.2:32430

🏃 Starting tunnel for service project-service.

NAMESPACE	NAME	TARGET PORT	URL
default	project-service		http://127.0.0.1:59780

🔔 Opening service default/project-service in default browser...

! Because you are using a Docker driver on darwin, the terminal needs to be open to run it.
